

Blonk Sustainability Tools

has an immediate vacancy for:

(Senior) LCA consultant animal and feed production

Do you have a vision on agri-food Life Cycle Assessment (LCA) projects with industrial stakeholders and experience with the implementation of databases and calculation tools? Are you looking to work on projects related to sustainable food and agricultural production? Blonk Sustainability Tools is looking for a (senior) LCA consultant animal and feed production. The successful candidate is responsible for the development and implementation of projects around APS-footprint, our software solution to make animal production systems more sustainable, and Agri-footprint, our LCA-database for agri-food commodities. We are looking for someone with a focus on quality and client service who generates innovative solutions and takes responsibility.

What will you be doing as (senior) LCA consultant animal and feed production?

You will carry out consultancy projects with appealing international clients of [Blonk Sustainability Tools](#), with a focus on organisations in the animal or feed production. In these projects, software solutions and databases are used to improve the environmental impact of companies and production chains in the agri-food sector. Relevant tools used in these projects are [APS-footprint](#), our LCA software solution for animal production systems, and [Agri-footprint](#), our international database for agri-food commodities.

For each client you set up a dedicated project approach, interacting with our software developers, data & model specialists, and other consultants within the team. In the next step you will carry out the project in cooperation with the internal team and the client's team. Besides that, you will develop partnerships with external organisations to improve and extend APS-footprint and Agri-footprint. You will work closely together with our software development team and seek to connect with other consultancy projects.

Your profile:

- Completed university education, in a natural science or agricultural subject
- 5-7 years work experience in LCA and/or the agri-food sector
- Commitment to sustainability
- Strong understanding of systems thinking
- Knowledge of data models and implementation
- Insights in relevant standards and guidelines related to LCA (think of PEF, ISO, LEAP, GFLI)
- Ability to understand client processes and make the connection with consultancy & IT-processes
- Good communication skills in English
- Client oriented
- A focus on quality

Bonus points:

- Dutch native speaker or good communication skills in Dutch, both spoken and written

We offer you:

- An inspiring working environment, focused on sustainability
- Plenty of room for own initiative and opportunities for personal development
- A contract for 32-40 hours per week
- Become part of an enthusiastic and young team of professionals

- Reimbursement of travel-to-work costs by public transport

Interested?

Does this position spark your interest? Are you keen to get started? Send your letter of motivation and CV (in Dutch or English) before 30 November 2020 by email to Hans Blonk, info@blonckonsultants.nl.
